Puffy Paint

You Will Need:

- ✓ 1 cup white shaving cream
- ✓ ½ cup white liquid glue
- ✓ Small bowl
- ✓ Food Coloring (optional)
- ✓ Paper to be painted

Directions:

1. Mix the shaving cream and glue together in a bowl.
2. If the mixture appears too “thin”, add more glue to make it “stiffer”.
3. Once painted, projects will require several hours to dry.

Fun Tips:

- ☺ Some children may initially resist mixing the ingredients with their fingers.
- ☺ Allow them to use a spoon until he or she develops a tolerance.
- ☺ Some children may need to apply the mixture with a paint brush.
- ☺ Gently entice your child to use the mixture as finger paint.
- ☺ When dry the paint will have an elevated or puffy appearance.
- ☺ This paint may be used for many projects such as Santa’s beard (Christmas), ghosts (Halloween), and Penguins (winter).
